

Thermalite™

Instructions on how to operate your Thermalite Plantation Shutters

Your Thermalite Shutters are a handmade window/door covering and should be handled with care to keep their immaculate presentation for years to come.

TO OPEN

Use two hands to open and close.

Place one hand a few blades above the other and open in unison to the desired position.

Never try to open with one hand as it will place a strain on the exclusive Ultra Clear Control.

TO CLOSE

Again place two hands on the blades, one higher and one lower and firmly close the blades together. This will ensure an even closure for the best light control and privacy.
